The increasing number of pupils staying at the school buildings during the noon hours have produced a serious problem of supervision. In order to correct this the noon periods have been shortened and rearranged. The hours of session are now as follows: Grades 7-12 8:30 to 12:00 and 12:45 to 2:50; Grades 1-3 (1st floor) 8:30 to 11:30 and 12:20 to 2:50; Grades 3-6 (2nd floor) 8:30 to 12:00 and 12:45 to 2:50. Grade 1 pupils may be dismissed at 2:30.

For several years it has been generally recognized that the load of administrative and supervisory duties at the grade school indicated that the principal had no time for classroom teaching. This year Mr. Craig has been relieved of his teaching assignments and is devoting his full time to his duties as principal.

## B. Program and Methods

Again this year all teachers and school nurses in the supervisory union spent a full week (Nov. 6-10) of hard work at a workshop planned jointly by the teachers and superintendent. This year two subjects were studied: (a) the unit method of instruction in the elementary school, and (b) guidance in the secondary school. Again the workshop was staffed by the Harvard-Boston University Extension Service. These workshops are proving to be exceedingly helpful to all participants in their search for better understanding of children and better ways of guiding them toward happy, integrated, wholesome living.

### PART III. SCHOOL PLANT

Two important improvements have been made in the school plant this past year: (1) new fluorescent lights at the high school and (2) interior painting of classrooms at the grade school. Less spectacular but sincerely appreciated by pupils and teachers are the tightening of windows, retreatment of floors and general improvement in appearance of the high school, largely due to the untiring efforts of the janitor.

The greatest problem of all pertaining to school buildings is the rapid increasing need for more suitable facilities for the high school. Last year 254 students were enrolled there. This year there are 280. Next year the number should be about the same but the year after (Sept. 1952) we may expect 290. After that the enrollment is likely to rise rapidly to over 325. Careful studies by various committees are being made of possible ways of finding solutions. All of these studies are worthy of the serious attention of all interested in the welfare of Jaffrey's boys and girls.

### PART VI. SPECIAL REPORTS

#### A. Report of the Cooperative School Study Committee

At their annual school district meetings in March, 1950, several towns in the Monadnock Region authorized committees to study the cooperative school situation in conjunction with representatives of other towns. A few towns did not take an official vote but left the appointment of their committees to their school boards. Some towns have had committees of several years standing to study this question.

The first joint meeting of these committees was held at the Jaffrey High School on May, 23, 1950. Twenty-six citizens were present representing the towns of Jaffrey, Troy, Marlboro, Dublin, Fitzwilliam, Harrisville and Rindge. A smaller, more workable committee, designated as the Monadnock Regional Cooperative School Committee, was subsequently formed, representing all the above towns. Supplementing this citizens committee, Superintendents of Schools Lester B. Badger and Charles L. Bowlby, and Jaffrey Headmaster Robert Lewis have given freely of their time and counsel, which is much appreciated by the committee. Representatives of the State Department of Education have been present at many of our meetings to provide needed guidance and clarification of state policy.

Philip M. Darling of Jaffrey was originally elected chairman of the study committee, being obliged to resign this position on January 1, 1951, due to personal reasons which made it impossible to attend regular meetings. Dr. Samuel E. Paul of Troy was elected to succeed him.

First, let us review briefly the educational problems that face the three towns involved now maintaining separate high schools.

Jaffrey—is confronted with a substantial increase in enrollment and a building that is obsolete, undersized and in need of major repairs.

Troy—has had a 35 per cent increase in school enrollment in the past five years and is expecting an additional 20 per cent increase in the next five years. In September, 1951, two sessions will be necessary to take care of the pupils. An independent building program is under consideration.

Marlboro—has a fundamental problem in its obsolete building for its high school.

Common to all three of the above towns is the problem of operating high schools too small in enrollment. These schools are not big enough to offer a well-rounded program of study. The programs they do offer generally cost more per pupil than comparable programs in larger schools. They have too few teachers to offer the type of curriculum demanded by the complex society faced by today's youth. Their teachers are doing a fine piece of work but are seriously handicapped by the diversity of subjects they must offer. They have to be "Jack-of-all-trades". Teachers in a larger educational unit would specialize in their chosen subjects and reach maximum effectiveness in instructing our youth. The curriculum in the small high school is generally designed for that small percentage of students who go on to college. The large majority of the students would benefit from the larger school because it would offer a program that better meets its needs.

The larger unit made possible by a cooperative would provide a greater incentive to work due to the competition among a larger student body. Also, the opportunities for wider companionships and "learning to get along with the other fellow" are valuable assets.

In addition to the regular curriculum of study, the large gymnasium-auditorium would give every student a chance to participate in a physical education program which would include basketball, football, baseball, track, and gymnastics.

Every student could belong to some sort of club or activity such as camera, singing, orchestra, band, or dramatics.

Even the adults would benefit from the gymnasium-auditorium and other facilities as the school should be considered as a huge community assembly hall and its full value will be realized when it is used as such. Not to be overlooked are the opportunities for extension courses to be offered adults in helping them improve their station in life and open up new horizons of interest in arts, crafts, and hobbies.

In order to get this school we find an absolute minimum necessary. This minimum means the towns of Jaffrey, Troy and Marlboro. If these three towns agree to cooperate, the school is possible both from a financial point of view and from the creation of a sizable student body. The other towns in this area, if added to this minimum, will offer a still broader financial base to support building costs, and will find, to their advantage, that they have an active voting interest, ownership, and control in a most desirable educational plant that will provide the best training and education for their children.

The towns of Fitzwilliam, Rindge, Harrisville, and Dublin presently send their high school students outside their towns on a tuition basis. The curriculum offered in the proposed cooperative will be at least the equal of other large schools in the area. In addition, the pupils will have full participation in extra-curricular activities. The towns will have a voice in the policy-making and operation of the cooperative, thus making for better supervision of their own children. The pupils will have the feeling of belonging to this organization rather than being "outsiders".

The cooperative plan needs much thought as your committee has been amazed at the many factors involved in a cooperation of the sort,

it being entirely new to New Hampshire. However, the advantages of cooperative effort are very great and we feel they are well worth the time we have put into this study in order to bring you this report.

Fundamentally, the youth in our several towns should have an opportunity for an education that is equal to other more populated areas in this state and nation, so that in the years ahead they may be able to compete with others on an equal basis. This objective cannot be reached by the small town by itself, but it can be attained by these towns if they pool their education resources for their mutual advantage.

Many of the details of this cooperative are yet to be worked out. For example, whether the towns should cooperate on the secondary level only, or should consolidate their entire school systems, maintaining their separate elementary units but bringing them all under one administrative unit. There are also certain legislative changes that could materially affect the situation.

Your committee feels so strongly about the educational advantages that could derive to the towns involved that it is preparing to ask for funds at your annual school district meetings in March of this year to insure the continuation of this cooperative school study committee and enable it to enlist outside professional assistance, make necessary detailed building studies, make land surveys, etc. and publish the pertinent facts and figures so that each town will have the proper background information to reach a wise decision.

Are the citizens in these towns farsighted enough to see this study through to the best conclusion? The answer is up to you.

#### **COOPERATIVE SCHOOL COMMITTEE**

Jaffrey: Mr. Ernest Pratt, Mr. Vernon J. Bean, Mr. Philip Darling.

Troy: Dr. Samuel E. Paul, Mr. F. Fuller Ripley.

Marlboro: Mr. Alden J. Beauregard, Mr. Oscar Croteau.

Harrisville: Mr. William Bemis, Mrs. John J. Colony, Jr.

Rindge: Mr. Raymond Ford, Mr. John Pangborn, Mr. W. B. Coates, Jr.

#### **BUILDING COSTS**

The estimated cost as of January, 1951, of a 600 student school has been placed at \$600,000.00 which would serve Jaffrey, Troy and Marlboro; a 900 student school has been placed at \$800,000.00 which would serve the seven towns listed.

By state legislation, building costs of a cooperative school are shared by the participating districts according to equalized valuation.

The committee feels that there is public interest in a so-called Monadnock Region High School sufficient to make it a definite possibility that public spirited citizens and industries would contribute perhaps up to \$200,000.00 to bring into being a superior educational plant for the youth of the region. Therefore, two columns of cost figures are shown below, one for a \$600,000.00 capital investment by the towns and one for \$800,000.00.

### B. Report of School Building Committee

(Committee appointed under Article 10 of the 1946  
School District Warrant)

The School Building Committee respectfully draws your attention to its continuing recognition of the needs which face our schools as stated in earlier reports, notably the one for calendar year 1947.

The committee acknowledges the significance of the figures compiled and published recently which estimate that school enrollments will be considerably higher during the next eleven years (which is the period covered by the figures) and may remain at a high level for an undetermined number of years after that.

Believing that increased facilities must be constructed soon, and that land should be available for expansion in case further study should later indicate its desirability, this committee has thought it well to secure a price on the land adjoining the high school lot. It has turned the information over to the School Board with the recommendation that it be brought to the attention of the School District through an item in the warrant for this meeting.

This committee offers the following specific recommendations:

1. An intensified study of needs and possible solutions should be carried on within the next two years.
2. Actual construction of new facilities should be begun and completed during the third year from now.
3. Occupancy and use of these facilities should commence during the fourth year when estimated enrollment will require new space.
4. A renewed study of plans now in possession of the School District should be made to determine if they can be altered to accommodate the anticipated enrollment.
5. Consideration should again be given to the possibility of effectively and economically altering the present Grade School building to house the High School program, and to converting the present High School facilities to the use of the program of the first six grades.

Respectfully submitted:

EVELYN H. RUFFLE,  
RALPH E. BOYNTON,  
ALFRED S. DESPRES,  
JAMES B. PERRY,  
ROBERT G. LEWIS, Chairman.

The School Building Committee.
